

Overview ► BioBlend's **EPIC EL (EsterLink)** Dust Suppressant (DS) is a plant based (soy) natural ester dust control product uniquely designed to greatly reduce fugitive dust created by vehicle traffic, industrial & agricultural equipment, material handling equipment as well as many other tumultuous dusty environments. BioBlend's **EsterLink** technology was developed in a world class research and development facility in a prominent Upper Midwestern University. This scientific approach allowed the creation of this cutting-edge renewable and biodegradable dust suppressant.

EPIC EL DS not only provides piece of mind in using a biobased environmentally sustainable product, but it also provides superior, long lasting performance over traditional magnesium/calcium chlorides. As an added benefit, you can use the same application equipment as with traditional types of products and does not need to be cleaned out when the day is done. **EPIC EL** is manufactured from renewable feedstocks which provide a non-toxic and non-corrosive emulsion product.

BioBlend's **EPIC EL** Dust Suppressant is formulated featuring our proprietary **EsterLink** technology and is **eSyn™** Certified.

Typical Properties ▼

Property	EPIC EL
Product Code	BB4200040
Appearance	Amber Liquid
Solubility in Water	Emulsifies
Base Product	Natural Plant Esters
Form	Concentrate

Key Attributes / Approvals ►

- USDA BioPreferred Program – 100% Biobased
- Do not allow to freeze
- Concentrate – Designed to be mixed with water
- Concentrate needs to be agitated prior to use & in rare cases general heating of the product to approximately 100°F may be required
- Consult with your BioBlend representative to determine desired mix ratios and application rates

See the Safety Data Sheet (SDS) for emergency, proper handling and disposal information. Rev. EPICELDS-02032021
